# Acknowledgement

I would like to express my gratitude to the whole Clevered team, Shivani ma'am, Avishek sir for guiding me and helping me with this project. I also thank Mr. Ken for his immensely valuable feedback.

# About me

My name is Lakshya Narula and I love sports. I play basketball, tennis and badminton and love other forms of recreational activities too. I study in Amity Global school and live in Gurgaon. I used to live in Switzerland before. I also have an interest in languages and thus speak 3 of them fluently: English, Hindi and French and am learning German. I am pretty new to the world of programming and specially machine learning and hope to keep learning.

# My experience with Clevered

This was my first internship and I absolutely don't regret it. I find that the teachers have been very helpful and supportive. The journey has been very fun and the students are very interactive too. There's still a lot to learn and I hope to do another such internship very soon.
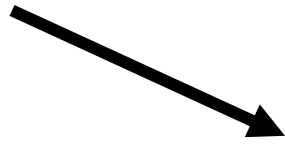

# About App

The app is made to facilitate the lives of students. It includes a few features that might help make their lives easier. It has a login portal and main site.

It includes a feature for making notes just by saying an audio and also includes a chatbot which allows a general conversation.

# HOW TO USE THE APP?

1) Click on Run button to run the code.

2) This will be the first screen that will appear.

3) Enter the Username as "Lakshya".
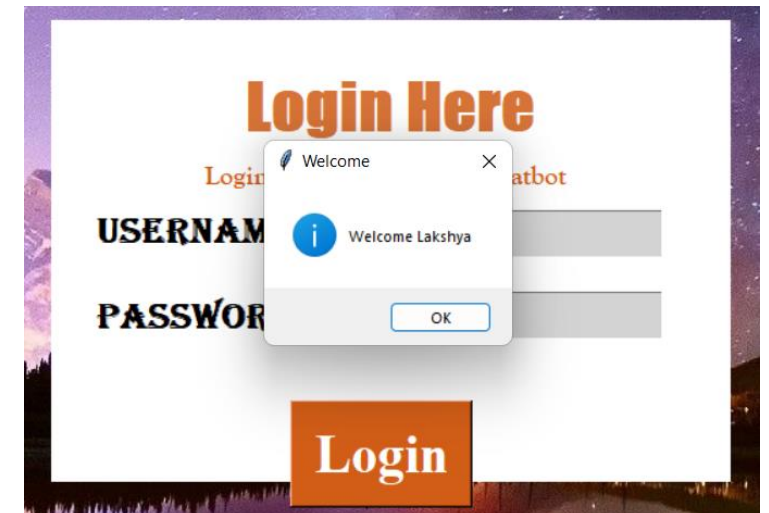

4) Enter the Password as "123".

5) In case you want to change the username and password, go to the code and edit this part.

```python
def login_function(self):
    if self.txt_pass.get()=="" or self.txt_user.get()=="":
        messagebox.showerror("Error","All fields are required",parent=self.root)
    elif self.txt_user.get()!="Lakshya" or self.txt_pass.get()!="123":
        messagebox.showerror("Error","Invalid Username or Password",parent=self.root)

    else:
```
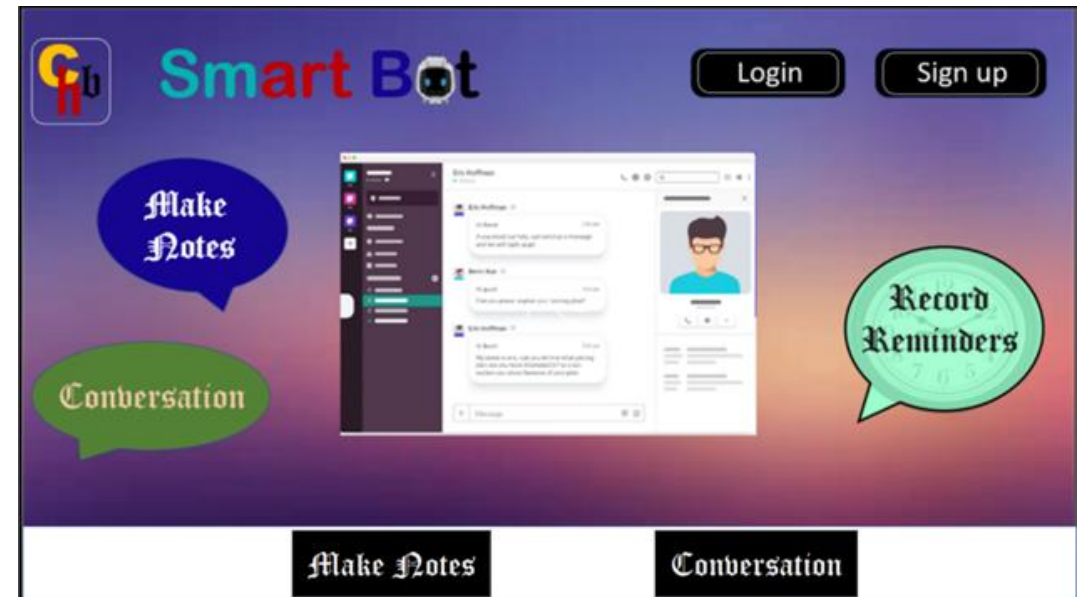

6) After entering both, click on the Login button

7) Then, press 'Ok' button in the message box that appears.

8) Then, press the 'Yes' button to proceed to the main page.

9) This screen will appear which is the main page of the program.

10) Press the 'Make Notes' button to go to the notes page.

11) Press 'Click here' to start the process.

12) Press the 'Conversation' button on the main page to go to the Chatbot page.

13) Press 'Click here to start the process.
